## General Information

Invesco Markets II plc (the "Company") is an open-ended variable capital company with segregated liability between Funds of the Company (each a "Fund" and collectively the "Funds"). The Company was incorporated on 11 September 2015. It is organised under the laws of Republic of Ireland as a public limited company pursuant to the Companies Act 2014 (as amended) and as an undertaking for collective investment in transferable securities pursuant to the European Communities ("Undertakings for Collective Investment in Transferable Securities") Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities Regulations 2026 (the "Central Bank UCITS Regulations").

The Company is structured as an umbrella investment company and comprises separate Funds which may be established from time to time by the Directors with the prior approval of the Central Bank of Ireland (the "Central Bank").

The particulars of each Fund are set out in a separate Supplement. Any such Supplement lists all of the existing Funds. Redeemable Shares/Shares (these terms are used interchangeably throughout the Financial Statements) of more than one Class may be issued in relation to a Fund. Information contained within the Supplements is selective and should be read in conjunction with the Prospectus. On the introduction of any new Class of Shares, the Company prepares and the Directors will issue documentation setting out the relevant details of each such Class of Shares. A separate portfolio of assets is maintained for each Fund and investments are made in accordance with the investment objective applicable to each Fund.

## Investment Objectives and Policies

The Articles provide that the investment objective and policies for each Fund be formulated by the Directors at the time of the creation of the Funds.

The investment objective of each Fund is to seek to provide Redeemable Shareholders/Shareholders (these terms are used interchangeably throughout the Financial Statements) with a Target Performance linked to the performance of a Reference Index or Reference Asset by directly or indirectly purchasing a portfolio of transferable securities that may (but is not obliged to) comprise all or a representative sample of the constituent securities of that Reference Index or Reference Asset.

Each passively managed Fund will seek to achieve its objective by pursuing a policy which will seek to track the performance of a Reference Index or Reference Asset and will generally use either a Replication Strategy, Sampling Strategy or Master Feeder Strategy, with the aim of minimising as far as possible the difference in performance between the Funds and the relevant Reference Index or Reference Asset. The Investment Manager determines whether a Replication Strategy, Sampling Strategy or Master Feeder Strategy is most appropriate for a Fund. The Relevant Supplement will specify and describe the strategy the applicable Fund intends to use.

The following is a summary description of each of the Replication Strategy, Sampling Strategy and Master Feeder Strategy.

- Replication Strategy - this strategy seeks to hold all of the securities of a particular Reference Index or Reference Asset, with the approximate weightings of that Reference Index or Reference Asset, so that the portfolio of such Fund is a near mirror-image of the components of the relevant Reference Index or Reference Asset.
- Sampling Strategy - this strategy seeks to build a representative portfolio that provides a return comparable to that of a Reference Index or Reference Asset. This strategy is used for tracking certain equity or fixed income indices which are too broad to replicate (i.e. the Reference Index or Reference Asset contains too many securities for the Fund to be able to purchase them all efficiently) contain securities which are currently unavailable or difficult to purchase in the open markets or an announcement has been made that certain securities will shortly be included as components of the Reference Index or Reference Asset. Consequently, a Fund using this strategy will typically hold only a subset of the securities which comprise the relevant Reference Index or Reference Asset.
- Master Feeder Strategy - this strategy seeks to achieve the investment objective of the relevant Fund by investing substantially all (and in any event no less than 85%) of the assets of the relevant Fund in another eligible UCITS CIS in accordance with the requirements of the Central Bank.

A passively managed Fund may also on occasion hold securities which were not comprised in the relevant Reference Index or Reference Asset where the Investment Manager believes this to be appropriate in light of the investment objective and investment restrictions of the Fund, or other factors such as market conditions. The potential for any such proposed investment by a Fund will be disclosed in the relevant Supplement.

In limited circumstances and only where disclosed in the Supplement a passively managed fund may also use the Swap Strategy.

- Swap Strategy - this strategy uses financial derivative instruments and transactions and/or OTC derivatives to achieve the Target Performance by exchanging the performance of a basket of global equity securities and equity related securities in return for the performance/return of the Reference Index.

Each actively managed Fund will seek to achieve its objective by investing in an actively-managed portfolio of securities, which applies the security selection and portfolio construction process of the Investment Manager on a discretionary basis.

In each case, information in relation to the types of instruments or securities in which the relevant Fund will invest, including details in relation to the exchanges or markets on which the Fund's investments will be listed or traded, will be set out in the Supplement of the relevant Fund.

There is no assurance that the investment objective of any Fund whose performance is linked to the Reference Index or Reference Asset will actually be achieved.

The individual Fund's investment objectives and policies are detailed on pages 12 to 54.

As at 30 June 2026, the Company had 92 active Funds.

In tracking the Reference Index, the Investment Manager applies the Sampling Strategy, which includes the use of quantitative analysis, to select securities from the Reference Index that use factors such as the country weights, industry sectors and liquidity.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk, return and environmental, social and governance ("ESG") characteristics either (a) closely resemble the risk, return and ESG characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

### Invesco EUR Government and Related Green Bond Weighted UCITS ETF

The investment objective of the Invesco EUR Government and Related Green Bond Weighted UCITS ETF (the "Fund") is to provide the performance of the European government bond market by investing in an actively managed portfolio of government and government-related bonds that also factors certain environmental, social, and corporate governance ("ESG") criteria into the portfolio construction and maximises exposure to Green Bonds subject to exposure and liquidity considerations.

In order to achieve its investment objective, the Fund will generally invest in a portfolio of euro denominated government and government-related bonds predominantly issued by European issuers with an investment grade credit rating.

Securities are selected by the Investment Manager based on three criteria:

- compliance with the Fund's ESG policy (the "ESG Policy");
- maximising exposure to Green Bonds subject to specific exposure and liquidity considerations; and
- the overall ability of the Fund's portfolio to meet the targets set out in the "Benchmark" section of the Supplement to the Prospectus.

To qualify as eligible for investment by the Fund, a bond must be classified as treasury or government related at a Bloomberg BCLASS Classification Level 1 and must have an investment grade rating by the rating agencies S&P, Fitch or Moody's. Investment grade securities are those rated BBB- or higher by Standard and Poor's or Fitch and Baa3 or higher by Moody's. If the rating for a specific bond is unavailable, the rating of the issuer is to be used instead. Otherwise, unrated securities are eligible if they are determined by the Investment Manager to be of comparable quality to the above based on internal assessment of issuer credit quality. If the ratings of a bond differ between agencies, the middle rating is used to determine a bond's credit quality. If only two agencies rate a bond, the more conservative (lower) rating is used. If only one agency rates a bond, that single rating is used. If the credit rating of any security held by the Fund is downgraded below these respective ratings, the Investment Manager will liquidate this position at the earliest optimal opportunity, within 90 days of the downgrade, taking due account of the interests of its Shareholders.

Fixed and floating rate bonds are eligible for inclusion. The Fund may invest up to 10% of its assets in floating rate bonds.

The Fund will not invest in bonds that are in default at the time of investment. If a bond defaults subsequent to purchase by the Fund, the Investment Manager will determine in its discretion whether to hold or dispose of such security, taking due account of the interests of its Shareholders.

The Fund may invest up to 30% of its assets in bonds denominated in currencies other than euro. Exposure to exchange-rate fluctuations resulting from these investments will be hedged back to euro at the Investment Manager's discretion. The Fund will only invest in bonds from developed market issuers, unless an issuer is from the European Economic Area (EEA) in which case an emerging market issuer is eligible; it is not expected that the Fund would invest more than 10% of its assets in securities from emerging market issuers. The Fund may invest up to 30% of its assets in issuers not from the EEA.

### Invesco MSCI China All Shares Stock Connect UCITS ETF

The investment objective of the Invesco MSCI China All Shares Stock Connect UCITS ETF (the "Fund") is to achieve the net total return of the MSCI China All Shares Stock Connect Select Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market circumstances, for example, market dominance. Market dominance exists where a particular component of the Reference Index has a dominant position in the particular market sector or geographical region in which it operates and as a result accounts for a large proportion of the Reference Index. This means that the Fund may have a high concentration of investment in a particular issuer.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

### Invesco US Municipal Bond UCITS ETF

The investment objective of the Invesco US Municipal Bond UCITS ETF (the "Fund") is to achieve the total return performance of the ICE BofA US Taxable Municipal Securities Plus Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy").

In tracking the Reference Index, the Investment Manager applies the Sampling Strategy, which includes the use of quantitative analysis, to select securities from the Reference Index with the goal of matching key characteristics of the Reference Index such as the weighted average duration, industry weights, issuer types, regional exposures and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy, the Fund may also hold securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition is expected to improve the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated.

Whilst the level of sampling will vary over the life of the Fund depending on asset levels of the Fund, market structure and other factors, including liquidity, degree of correlation across different subsets of the taxable municipal market, the volume of issuances in the taxable municipal bond market and the diversity of different types of issuing entities, it is generally expected that the Fund will hold a total number of securities that is significantly less than the number in the Reference Index— frequently less than 10% – though this may change and the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective. The Fund will hold municipal securities (being debt securities issued by state and local governments in the United States, which are generally used to finance public projects), corporate bonds and other types of securities that may comprise the Reference Index.

The reason the Investment Manager expects to hold a significantly fewer securities than what is found in the Reference Index is that the issuance of municipal securities is frequently done in multiple, smaller issuances rather than in the less frequent, larger issues that are common in, for example, the investment grade corporate bond markets. As a result, the Reference Index has a very large number of individual securities with highly similar characteristics. It is these characteristics that the Investment Manager looks to replicate with the Sampling Strategy.

### Invesco EUR AAA CLO UCITS ETF

The investment objective of Invesco EUR AAA CLO UCITS ETF (the "Fund") is to seek to provide consistent income and capital preservation over the long term.

In order to achieve the investment objective, the Fund will primarily invest in AAA-rated (or equivalently rated by a nationally recognised statistical rating organisation) tranches of Euro denominated floating rate debt securities issued by collateralised loan obligations ("CLOs").

A CLO is a structure that issues fixed- or floating-rate debt securities that are collateralised by a pool of loans and bonds, which primarily include senior secured loans, broadly syndicated loans (i.e., loans with offering sizes that are typically greater than EUR250 million), floating rate notes, high yield bonds and subordinated corporate loans, including loans and bonds that may be rated below investment grade or equivalent unrated loans or bonds. The underlying loans and bonds in a CLO are selected by the CLO's manager.

The Fund will invest in floating rate debt tranches of CLOs ("CLO Debt Securities"). The Fund will not invest in fixed rate debt tranches or equity tranches. The Fund may also invest in floating rate debt tranches of static CLOs which, unlike a typical CLO Debt Security, does not allow for active management of the underlying loan portfolio, meaning that once the loans and/or bonds are selected and placed in the CLO Debt Securities, there is no ability for the CLO manager to buy or sell loans and/or bonds except in very limited circumstances.

The Fund may invest in CLO Debt Securities of any maturity and tranche size.

The Fund may invest up to 10% of its net assets in securities that are denominated in currencies other than Euro. Exposure to exchange-rate fluctuations resulting from these investments will be hedged back to Euro at the Investment Manager's discretion.

The Fund is subject to risk retention requirements under the European Securitisation Regulation (EU 2017/2402) such that the Fund may only invest in CLOs if the originator, sponsor or original lender of the CLO has disclosed that it retains, at issuance and on an on-going basis, a material net economic interest in the CLO of at least 5%. If the originator, sponsor or original lender of the CLO ceases to retain the requisite material net economic interest and that position will not be imminently rectified, the Investment Manager will arrange for disinvestment of the relevant CLO as soon as reasonably practicable, having due regard to the best interests of the Shareholders.

At least 80% of the CLO Debt Securities in which the Fund will invest will be AAA-rated (as rated by at least one rating agency) CLO Debt Securities. Up to 20% of CLO Debt Securities in which the Fund will invest may be below AAA-rated subject to such CLO Debt Securities being rated investment grade and predominantly comprising AA-rated CLO Debt Securities. If a security is downgraded subsequent to its purchase by the Fund, the Investment Manager will take such action as required as soon as reasonably practicable, taking due account of the interests of its Shareholders.

The majority of CLO Debt Securities that the Fund will invest in will be classified as 144A and/or RegS securities.

The Fund will not invest in CLO Debt Securities where Invesco, or a subsidiary, is acting as the CLO manager.

The Fund may also invest a portion of its assets in cash or other short-term instruments, such as money market instruments (Euro-denominated government bonds and short-dated government bonds) or, money market funds, for the purpose of liquidity management purposes and managing redemptions.

The Fund may invest in fixed rate tranches of CLO Debt Securities up to a maximum of 15% of its net assets. Up to 20% of the CLO Debt Securities in which the Fund will invest may be below AAA-rated subject to such CLO Debt Securities being rated investment grade and predominantly comprising AA-rated CLO Debt Securities. ### Invesco UK Gilt 15+ Year UCITS ETF

The investment objective of the Fund is to provide exposure to the performance of GBP denominated, fixed rate, investment grade ("IG") government debt issued by the United Kingdom with at least 15 years remaining to maturity.

In order to achieve the investment objective, the Fund will seek to track the total return performance of the Bloomberg UK Gilt 15+ Index (the "Reference Index"), less fees, expenses and transaction costs.

Further information on the components and selection criteria of the Reference Index is set out below under "General Description of the Reference Index".

In tracking the Reference Index, the Investment Manager applies a sampling strategy ("Sampling Strategy") which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank. The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes. ## Investment Objectives and Policies (continued)

### Invesco Europe Enhanced Equity UCITS ETF

The investment objective of the Fund is to achieve a long-term return in excess of the Benchmark by investing in an actively-managed portfolio of European equities.

In order to achieve the investment objective, the Fund will invest primarily in a portfolio of equity and equity-related securities including warrants (received only as a result of corporate actions), tracking stocks (i.e. a special stock offering issued by a company which tracks the financial performance of a particular segment or division of that company) and depositary receipts of companies from Europe. Securities are selected based on three criteria: 1) attractiveness determined in accordance with the Sub-Investment Manager's quantitative investment model; 2) consistency between the portfolio's expected risk characteristics and the Fund's investment objective, and 3) compliance with the Fund's ESG Policy.

The Investment Manager is responsible for the oversight of the Fund's portfolio and its risk management and delegates responsibility for defining the investment universe and the optimisation approach used in the portfolio construction to the Sub-Investment Manager.

#### Initial Investment Universe

The initial step in the investment process entails the Sub-Investment Manager defining a proprietary universe of European equity securities (the "Initial Investment Universe"). The Initial Investment Universe comprises approximately 500 companies selected by the Sub-Investment Manager based on their liquidity and free-float adjusted market capitalisation such that the Initial Investment Universe comprises the most liquid European equity securities which are classified as large- and mid-cap in terms of free-float adjusted market capitalisation.

#### ESG Policy

Screening will be employed to exclude from the Initial Investment Universe securities issued by issuers which derive or generate a predetermined level of revenue or turnover from activities such as (but not limited to), production of tobacco, activities related to coal (specifically production and distribution of hard coal and lignite) and any activities related to controversial weapons. All issuers considered for investment will be excluded if they are engaged in very severe controversies, they will also be screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data. For more information on the ESG Policy and the criteria detailed therein, please refer to the website [etf.invesco.com](http://etf.invesco.com) and to the annex to this Supplement.

The Fund's compliance with the ESG Policy will be reviewed on an ongoing basis by the Sub-Investment Manager. Where a previously eligible security subsequently ceases to meet the Fund's ESG Policy or where the Fund acquires a security as a result of a corporate action and such security does not meet the Fund's ESG Policy, the Sub-Investment Manager will ensure disinvestment when it next rebalances the portfolio, having due regard to the best interests of the Shareholders and subject to liquidity and regulatory factors.

#### Portfolio Construction Approach

Following the application of the ESG Policy to the Initial Investment Universe, the Sub-Investment Manager applies an optimisation process based on three major factors: Value, Quality and Momentum. The Sub-Investment Manager uses factor definitions developed by the Sub-Investment Manager that are designed to deliver superior investment results relative to standard publicly available factor definitions used by, among others, the leading index providers in the market. The factors can be broadly described as follows:

- i Value: This investment factor aims to capture the potential outperformance of companies that are perceived to be "inexpensive" relative to sector or market averages, where such determination is based primarily on various financial ratios such as cashflow yield and price to earnings ratio.
- ii Quality: This investment factor aims to capture the potential outperformance of stocks that demonstrate a stronger balance sheet (e.g. lower levels of debt, higher profit margins) relative to sector or market averages.
- iii Momentum: This investment factor aims to capture the potential continued outperformance of those stocks whose historical share price performance or earnings growth have exceeded sector or market averages.

The Sub-Investment Manager uses its proprietary model to rank all stocks in the Initial Investment Universe according to its attractiveness with respect to each of the above-mentioned factors.

Rankings are conducted within industry groups to ensure comparability. The optimisation then looks to maximize the exposure of the Fund to the above-mentioned factors. This optimisation explicitly includes a consideration of the transaction costs.

Whilst the Fund will hold a number of constituents of the Benchmark, the Fund may also hold securities that are not constituents of the Benchmark, and the number of securities held by the Fund will generally be significantly less than the number of constituents of the Benchmark. Therefore, it is expected that the composition of the Fund will vary significantly from that of the Benchmark. However, the Investment Manager will seek to manage the Fund's risk profile relative to that of the Benchmark and so will consider the relative composition of the portfolio against the Benchmark and seek to optimise the Fund at the regular rebalancing such that in normal market conditions:

- i. the Fund's exposure to individual countries weights is within a +/-1.5% range relative to the Benchmark;
- ii. the Fund's exposure to issuers that are also constituents of the Benchmark will have weights that do not exceed +1% relative to the Benchmark, while the Fund's exposure to issuers that are not constituents of the Benchmark will not exceed a security weight of 1%;
- iii. the Fund's exposure to individual industries and sectors weights is within +/- 2% range relative to the Benchmark;
- iv. the beta of the Fund compared to the Benchmark is within the range of 0.99-1.01; and
- v. the target (ex-ante) annualized tracking error of the Fund and the Benchmark is approximately 1% and shall not exceed 2%.

This entire ranking, risk modelling and portfolio construction process is repeated each month, following which the Fund's holdings are rebalanced by the Investment Manager in line with the new target portfolio holdings provided by the Sub-Investment Manager.

The target (ex-ante) tracking error of the Fund referred to in (v), above, is the result of the optimisation while applying these constraints to manage the Fund's risk profile. The purpose of measuring the ex-ante tracking error is to assist in ensuring that the risk profile of the Fund remains comparable to that of the Benchmark, not to represent how closely the Fund will resemble the Benchmark or how the Fund will perform compared to the Benchmark. While the Fund does not have a targeted absolute return due to the changing volatility and return characteristics of equity markets, the Fund generally expects to achieve a return in excess of the Benchmark in normal market conditions while offering a comparable risk profile as the Benchmark. There is potential that the Fund may not outperform the Benchmark or that it may only generate relatively low net returns in excess of the Benchmark.

The Fund shall not invest more than 10% of its net assets in other UCITS or other open or closed ended CIS.

The Sub-Investment Manager uses its proprietary model to rank all stocks in the Initial Investment Universe according to its attractiveness with respect to each of the above-mentioned factors.

Rankings are conducted within industry groups in each region to ensure comparability. The optimisation then looks to maximize the exposure of the Fund to the above-mentioned factors. This optimisation explicitly includes a consideration of the transaction costs.

This entire ranking, risk modelling and portfolio construction process is repeated each month, following which the Fund's holdings are rebalanced by the Investment Manager in line with the new target portfolio holdings provided by the Sub-Investment Manager.

The target (ex-ante) tracking error of the Fund referred to in (v), above, is the result of the optimisation while applying these constraints to manage the Fund's risk profile. The purpose of measuring the ex-ante tracking error is to assist in ensuring that the risk profile of the Fund remains comparable to that of the Benchmark, not to represent how closely the Fund will resemble the Benchmark or how the Fund will perform compared to the Benchmark.

## Investment Objectives and Policies (continued)

### Invesco Emerging Markets Enhanced Equity UCITS ETF (continued)

While the Fund does not have a targeted absolute return due to the changing volatility and return characteristics of equity markets, the Fund generally expects to achieve a return in excess of the Benchmark in normal market conditions while offering a comparable risk profile as the Benchmark. There is potential that the Fund may not outperform the Benchmark or that it may only generate relatively low net returns in excess of the Benchmark.

#### Other Investments

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes, and/or for investment purposes to assist in achieving its investment objective, including to access securities which the Fund may not be able to access directly. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, and non-deliverable forwards.

The Fund shall not invest more than 10% of its net assets in other UCITS or other open or closed ended CIS.

Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under "Investment Objectives & Policies" and under "Investment Restrictions and Permitted Investments".

### Invesco US Enhanced Equity UCITS ETF

The investment objective of the Fund is to achieve a long-term return in excess of the Benchmark by investing in an actively-managed portfolio of US equities.

In order to achieve the investment objective, the Fund will invest primarily in a portfolio of equity and equity-related securities (including warrants (received only as a result of corporate actions), tracking stocks (i.e. a special stock offering issued by a company which tracks the financial performance of a particular segment or division of that company) and depositary receipts of companies from the United States of America. Securities are selected based on two criteria: 1) attractiveness determined in accordance with the Sub-Investment Manager's quantitative investment model; and 2) consistency between the portfolio's expected risk characteristics and the Fund's investment objective.

The Investment Manager is responsible for the oversight of the Fund's portfolio and its risk management and delegates responsibility for defining the investment universe and the optimisation approach used in the portfolio construction to the Sub-Investment Manager.

#### Initial Investment Universe

The initial step in the investment process entails the Sub-Investment Manager defining a proprietary universe of US equity securities (the "Initial Investment Universe"). The Initial Investment Universe comprises approximately 650 companies selected by the Sub-Investment Manager based on their liquidity and free-float adjusted market capitalisation such that the Initial Investment Universe comprises the most liquid US equity securities which are classified as large- and mid-cap in terms of free-float adjusted market capitalisation. 4

#### Portfolio Construction Approach

Following the definition of the Initial Investment Universe, the Sub-Investment Manager applies an optimisation process based on three major factors: Value, Quality and Momentum. The Sub-Investment Manager uses factor definitions developed by the Sub-Investment Manager that are designed to deliver superior investment results relative to standard publicly available factor definitions used by, among others, the leading index providers in the market. The factors can be broadly described as follows:

- i Value: This investment factor aims to capture the potential outperformance of companies that are perceived to be "inexpensive" relative to sector or market averages, where such determination is based primarily on various financial ratios such as cashflow yield and price to earnings ratio.
- ii Quality: This investment factor aims to capture the potential outperformance of stocks that demonstrate a stronger balance sheet (e.g. lower levels of debt, higher profit margins) relative to sector or market averages.
- iii Momentum: This investment factor aims to capture the potential continued outperformance of those stocks whose historical share price performance or earnings growth have exceeded sector or market averages.

The Sub-Investment Manager uses its proprietary model to rank all stocks in the Initial Investment Universe according to its attractiveness with respect to each of the above-mentioned factors.

Rankings are conducted within industry groups to ensure comparability. The optimisation then looks to maximize the exposure of the Fund to the above-mentioned factors. This optimisation explicitly includes a consideration of the transaction costs.

Whilst the Fund will hold a number of constituents of the Benchmark, the Fund may also hold securities that are not constituents of the Benchmark, and the number of securities held by the Fund will generally be significantly less than the number of constituents of the Benchmark. Therefore, it is expected that the composition of the Fund will vary significantly from that of the Benchmark. However, the Investment Manager will seek to manage the Fund's risk profile relative to that of the Benchmark and so will consider the relative composition of the portfolio against the Benchmark and seek to optimise the Fund at the regular rebalancing such that in normal market conditions:

- i. the Fund's exposure to issuers that are also constituents of the Benchmark will have weights that do not exceed +1% relative to the Benchmark, while the Fund's exposure to issuers that are not constituents of the Benchmark will not exceed a security weight of 1%;
- ii. the Fund's exposure to individual industries and sectors weights is within +/- 2% range relative to the Benchmark;
- iii. the beta of the Fund compared to the Benchmark is within the range of 0.99-1.01; and
- iv. the target (ex-ante) annualized tracking error of the Fund and the Benchmark is approximately 1% and shall not exceed 2%.

This entire ranking, risk modelling and portfolio construction process is repeated each month, following which the Fund's holdings are rebalanced by the Investment Manager in line with the new target portfolio holdings provided by the Sub-Investment Manager.

The target (ex-ante) tracking error of the Fund referred to in (iv), above, is the result of the optimisation while applying these constraints to manage the Fund's risk profile. The purpose of measuring the ex-ante tracking error is to assist in ensuring that the risk profile of the Fund remains comparable to that of the Benchmark, not to represent how closely the Fund will resemble the Benchmark or how the Fund will perform compared to the Benchmark.

### Invesco EURO STOXX 50 Equal Weight UCITS ETF

The investment objective of the Fund is to provide exposure to the performance of equally weighted large capitalisation companies in the Eurozone.

In order to achieve the investment objective, the Fund will seek to replicate the net total return performance of the EURO STOXX 50 Equal Weight Index (the "Reference Index") less fees, expenses and transaction costs.

Further information on the components and selection criteria of the Reference Index is set out below under "General Description of the Reference Index".

The Fund will employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. The Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index. In order to replicate the Reference Index, the Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

Further information in relation to how the Fund will seek to replicate the Reference Index is set out in section 4 "Investment Objective and Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.

There are a number of circumstances where gaining access to the components of the Reference Index may be prohibited by regulation, may not otherwise be in the Shareholders' interests or may not otherwise be possible or practicable.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, non-deliverable forwards. Further details on FDIs and how they may be used are contained in the main part of the Prospectus under "Appendix III - Use of Financial Derivative Instruments and Efficient Portfolio Management".

The Fund shall not invest more than 10% of its net assets in other UCITS, open ended CIS or closed ended collective investment funds that meet the requirements of the Central Bank (and, in the case of closed ended collective investment funds, that qualify as transferable securities).

With the exception of permitted investment in unlisted securities or in units of open-ended CIS, investment will be limited to the stock exchanges and regulated markets set out in Appendix I of the Prospectus.

Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under "Investment Objectives & Policies" and under "Investment Restrictions and Permitted Investments".

### Invesco Nasdaq-100 Income Advantage UCITS ETF

The investment objective of the Fund is to provide total return through the provision of income and long-term capital growth.

In order to achieve its investment objective, the Fund will generally: (1) invest in a portfolio of U.S. equity securities (the "Equity Component") designed to replicate the performance of the NASDAQ-100 Index® (the "Benchmark"); and (2) employ an income generation strategy implemented through investment in equity-linked notes ("ELNs") and/or options, along with holdings in cash and cash equivalent securities, including US Treasury Bills and money market funds (the "Income Generation Component"). The Fund is designed to generate income while providing some equity market upside participation exposure relative to the Benchmark whilst also providing some downside protection relative to the Benchmark in the event of broad equity market downturns.

The Investment Manager determines the construction of the Equity Component and has delegated to the Sub-Investment Manager responsibility for the management of the Income Generation Component and the adjustment of the allocation between the Equity Component and the Income Generation Component to balance the provision of stable income, account for market movements, provide equity participation with less volatility relative to the Benchmark, and provide downside protection. The Investment Manager remains responsible for the oversight of the Fund's portfolio and its risk management.

#### (1) Equity Component

The Investment Manager seeks to construct the Equity Component by physically investing in the securities that comprise the Benchmark generally in proportion to their weightings in the Benchmark. The Fund intends to invest the Equity Component in the constituents of the Benchmark in proportion to their weightings to the Benchmark unless doing so would impact the Fund's ability to remain sufficiently diversified in accordance with the UCITS Regulations and, in such circumstances, the constituents comprising the Equity Component may have different weightings compared to the Benchmark or comprise fewer securities than the Benchmark.

## Investment Objectives and Policies (continued)

### Invesco Nasdaq-100 Income Advantage UCITS ETF (continued)

The Benchmark consists of 100 of the largest domestic and international Nasdaq-listed non-financial companies by market capitalisation. Securities eligible for inclusion in the Benchmark include common stock, ordinary shares, tracking stocks, shares of beneficial interest, limited partnership interests and American Depositary Receipts ("ADRs") including depositary receipts that represent securities of non-US issuers. The Benchmark is sponsored by Nasdaq, Inc and more details on the Benchmark can be found at <https://indexes.nasdaqomx.com>.

Generally, between 70% and 85% of the NAV of the Fund will be invested in the Equity Component.

#### (2) Income Generation Component

The Sub-Investment Manager, seeks to generate income and provide downside protection through the Income Generation Component of the Fund's portfolio by investing in either options or high-income, short-term (generally less than 2 months) ELNs (or a combination thereof) together with holdings in cash and cash equivalent securities.

ELNs are fully funded hybrid instruments that are specially designed to combine the characteristics of investing in one or more underlying equity securities or an index of equity securities and a related equity derivative, such as a put or call option (or a combination thereof), in a single note form (typically senior, unsecured debt) issued by financial institutions. The Fund's portfolio of ELNs will be issued by a diversified group of international financial institutions.

The options that the Fund directly invests in, or the options embedded within the ELNs in which the Fund invests, will be based on the Benchmark. The Fund may invest in options or ELNs or a combination of both, as the Sub-Investment Manager deems appropriate to achieve the investment objective. This approach seeks to generate income using covered call and/or cash secured put strategies. The covered call strategy consists of selling call options against the Benchmark. The cash secured put strategy consists of holding cash and/or cash equivalent securities to fully collateralise put options sold against the Benchmark. It is intended that income will be generated through the sale of the options (by using the covered call and/or cash secured put strategies). This is based on the Fund being generally entitled to receive premia generated through the use of ELNs and/or options which will provide recurring cash flow to the Fund.

When the Fund sells a call option, it receives a premium but limits its opportunity to profit from an increase in the market value of the underlying Benchmark to the exercise price (plus the premium received). The maximum potential gain on an underlying instrument will be equal to the difference between the exercise price and the purchase price of the underlying Benchmark at the time the option is written, plus the premium received.

The Sub-Investment Manager seeks to enhance income stability and portfolio diversification by investing in ELNs/options in a staggered manner such that the proceeds of ELNs and/or options that have matured are re-invested in ELNs and/or options with a future maturity date with a view to creating more consistent income over time.

Generally, between 2% and 10% of the NAV of the Fund may be applied to the ELNs and/or options.

As part of the cash secured put strategy, the Fund will maintain holdings in cash and cash equivalent securities, which seeks to provide additional downside protection by limiting the Fund's exposure to broad equity market risk. Generally, between 10% and 25% of the NAV of the Fund may be invested in the cash and cash equivalent securities (US Treasury Bills and money market funds) which may constitute up to 25% of the Fund's NAV in a single Treasury Bill in accordance with Regulation 72 of the UCITS Regulations.

#### Other Investments

The Fund may invest in other open- or closed-ended CIS that provide exposure to markets similar to those in which the Fund may invest directly. However, the Fund will not invest more than 10% of its net assets in other CIS.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

#### Use of FDIs by the Fund

The Fund may engage in transactions in FDIs for investment purposes in line with the Income Generation Component to assist in achieving its investment objective. The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes.

In particular, the Fund intends to use the following FDIs listed on a Market or traded OTC as applicable: options (as discussed above), forwards contracts, futures, interest rate swaps, swaps on interest rate benchmarks, currency rate swaps and spot foreign exchange transactions. Further details on FDIs and how they may be used are contained in the Prospectus under "Appendix III – Efficient Portfolio Management and Use of Financial Derivative Instruments".

Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under "Investment Objectives & Policies" and under "Investment Restrictions and Permitted Investments".

### Invesco MSCI ACWI Islamic M-Series UCITS ETF

The investment objective of the Fund is to provide exposure to the performance of large and mid-capitalisation companies, that pass screens for adherence to Shari'ah investment principles, from global developed and emerging markets.

In order to achieve the investment objective, the Fund will seek to achieve the net total return performance of the MSCI ACWI Islamic M-Series Index (the "Reference Index") less fees, expenses and transaction costs.

Further information on the components and selection criteria of the Reference Index is set out below under "General Description of the Reference Index".

In tracking the Reference Index, the Investment Manager will apply a sampling strategy ("Sampling Strategy"), which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as country weights, industry sectors and liquidity. Investments made by the Fund will be compliant with Shari'ah guidelines prescribed by the Index Provider. The Shari'ah committee (the "Shari'ah Committee") appointed by the Investment Manager will be responsible for determining compliance of the Fund's investments with Shari'ah. Further information on the Shari'ah Committee is set out below under the heading "Shari'ah Committee".

The Fund shall not hold securities which are not component securities of the Reference Index, unless their future inclusion into the Reference Index is anticipated (which is determined by reference to the Reference Index rebalancing file which may be published by the Index Provider prior to each rebalancing date, as set out under the heading "Index Rebalancing"). The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

## **Investment Objectives and Policies (continued)**

### **Invesco MSCI ACWI Islamic M-Series UCITS ETF (continued)**

In the unlikely event that a previously eligible company subsequently ceases to meet the requirements of Shari'ah investment principles or where the Fund acquires a security as a result of a corporate action and such security does not meet Shari'ah investment principles, the Investment Manager will ensure disinvestment at the next relevant rebalance, having due regard to the best interests of the Shareholders and subject to liquidity, regulatory and other factors.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective & Policies" and section 5 "Investment Restrictions and Permitted Investments" of the Prospectus.
